OFFICE OF PETITIONS

RENEWED PETITION UNDER 37 CFR 1.47(b)

Come now the Assignees in the above-identified utility application, and respectfully petition the Asst. Commissioner for Patents to receive the completion of all formal filing requirements, the attached declaration unsigned by inventors Kim A. Anderson, Brian Smith, and Bernadene Magnuson (Attachment "A").

The attached Declaration establishes that inventors Kim A. Anderson, Brian Smith, and Bernadene Magnuson are recognized to be joint inventors of the apparatus and method set forth in the above-identified utility application and that efforts to obtain these inventors' signatures upon the requisite filing documents have met with no success, as also attested by the attached Declaration of the Agent for the Assignees (Attachment "B").

The invention as claimed was made by the co-inventors while employed by the Assignee, Idaho Potato Commission. The invention is a continuation-in-part of issued U.S. Patent No. 6,324,531, which named the same inventors as herein named. Copies of

signed Declarations and Assignments for that patent are attached hereto (Attachment "C"), indicating the inventors' declarations of their status as inventors and assigning the rights to the '531 patent and "any improvements on said inventions heretofore or hereafter made, any divisions or continuations of said application," to the Florida Department of Citrus and the Idaho Potato Commission. The "new matter" added to the present application over that which was present in the issued parent U.S. Patent No. 6,324,531 includes newly obtained data that is cumulative of the original invention and thus is not believed to change the inventorship from that of the parent '521 patent.

The joint Assignees of the instant application have proprietary interest in the invention embodied therein. Irreparable harm could result from an inability to continue prosecution of this application in a loss of pendency of the claims in the case.

It is respectfully submitted that these facts, together with the showing in the attached Declaration of the Agent for the Assignees and the enclosed Statements under 37 CFR 3.73(b), make it clear that Assignees have met all of the requirements under 37 CFR 1.47(b).

Wherefore, it is respectfully requested that the Commissioner receive and grant this petition for the purposes of filing this application without the signature of inventors Anderson, Smith, and Magnuson.

OFFICE OF PETITIONS

The Hon. Commissioner for Patents
Washington, D.C. 20231

Sir:

DECLARATION AND PETITION UNDER 37 CFR 1.47(b)

I, Jacqueline E. Hartt, do hereby declare and say as follows:

1. I am the agent of record in the above-referenced application and have worked with the assignees, Florida Department of Citrus and Idaho Potato Commission, in the preparation and filing of provisional patent application 60/069,036, utility parent application 09/210,358, now issued U.S. Patent No. 6,324,531, and the above-referenced utility patent application, which claims priority to both the issued '521 patent and the '036 provisional application.

2. Correspondence with named co-inventors Kim A. Anderson, Brian Smith, and Bernadene Magnuson, related to the above-referenced application, began on April 10, 2002, with the sending of the entire application papers, including the Specification and drawings of the instant application and declarations, to all named inventors. Several telephone calls have also been placed to co-inventors Anderson and Magnuson. The application papers and declarations were also re-sent via Federal Express on May 21, 2002, for which copies of the transmittal letter, unsigned declaration, assignment, and shipping label were previously submitted.

3. It is my understanding that the work and development by the co-inventors was within the scope of their employment with the Idaho Potato Commission, Co-Assignee. This is attested to by the enclosed "Renewed Petition under 37 CFR 1.47(b)" signed by the representative of the Idaho Potato Commission, Co-Assignee, Attorney Patrick J. Kole.

4. It has previously been submitted that co-inventors Anderson and Magnuson have expressed via the previously submitted e-mails their unwillingness to sign the transmitted inventor Declarations. No statements of any kind have been received from co-inventor Smith.

5. A Statement under 37 CFR 3.73(b) signed by Attorney Kole is also enclosed.

6. In a telephone conference held today, it was transmitted to the undersigned by Attorney Kole and Attorney Kenneth Keck, General Counsel of the Florida Department of Citrus, that the Florida Department of Citrus will transfer its portion of the rights to this invention to the Idaho Potato Commission. Therefore, no signature has been obtained from a representative of the Florida Department of Citrus. Such an Assignment document will follow these documents presently.

7. I hereby declare that all statements made herein are of my own accord and are true and that all statements are made on available information; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both, under Section 1001 of Title XVIII of the United States Code, and that any such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Dated: March 17, 2003.

Respectfully submitted,

ASSIGNMENT

WHEREAS, KIM A. ANDERSON of 406 Polly Street, Troy, Idaho 83871, BRIAN SMITH of 406 Polly Street, Troy, Idaho 83871, and BERNADENE MAGNUSON of 116 Flint Street, Moscow, Idaho 83843, hereinafter collectively referred to as Assignors, have made certain improvements or inventions in SYSTEM AND METHOD FOR IDENTIFYING THE GEOGRAPHIC ORIGIN OF A FRESH COMMODITY, for which Assignors have executed an application for United States Letters Patent filed on December 11, 1998, in the United States Patent and Trademark Office and given Serial No. 09/210,358; and

WHEREAS, FLORIDA DEPARTMENT OF CITRUS and IDAHO POTATO COMMISSION, hereinafter referred to as Assignees, are desirous of acquiring the same;

NOW THEREFORE, This Indenture Witnesseth: That for good and valuable consideration, receipt whereof is hereby acknowledged, Assignors do hereby assign and transfer to Assignees, their successors and assigns, all right, title and interest in and to said United States Patent application, the invention or inventions therein shown and described and any improvements on said inventions heretofore or hereafter made, any divisions or continuations of said application, and all patents, United States and foreign, to be granted upon any such application or for the invention or inventions thereof, and any reissues, continuations or extensions of said patents, each Assignee to own an undivided one-half interest in the whole; and Assignors do hereby authorize and request the Commissioner of Patents to issue all patents on said United States Patent applications or for the invention or inventions hereof, in accordance with this assignment.

Provided, however, that Assignors retain for themselves a personal and non-assignable royalty-free non-exclusive license to use the inventions disclosed and claimed in the application and any later improvements made by Assignors for the purpose of obtaining funds for grants funding research into the use of the inventions or any such later improvements for determining geographic origin of commodities other than potatoes and citrus fruit ("Other Commodities"). Provided further, in the event that such further research by Assignors for Other Commodities leads to royalty income derived from the licensing of any patents issuing from this application or any later improvements, then Assignors and Assignees shall share any royalty income derived from the licensing for Other Commodities equally.

And Assignors for said consideration hereby covenant and agree that each of the Assignors is the owner of the full title herein conveyed and have the right to convey the same, and agree that Assignors will communicate to Assignees any facts known to Assignors respecting said invention or inventions, and testify in any legal proceedings when called upon by Assignees, sign all lawful papers deemed by Assignees as expedient to vest in it the legal title herein sought to be conveyed or for the filing and prosecution of all applications and patents, United States and foreign, and otherwise aid Assignees, their successors and assigns, in obtaining full patent protection on said invention and enforcing proper protection under said patents, but in every instance at the Assignees' expense.
